The December American Magazine.

Three unusual articles on the war are contained in the December American Magazine. Under the title "War the Result of Poor Advertising" Gerald Stanley Lee explains why war is the last resort of governmental publicity bureaus and what takes place in a great country when the national billboards go down.

A town that is built from gunpowder and where the great bulk of war orders is filled is described by Merle Crowell, who gives his readers perhaps the best description of the powder industries that has been published since the beginning of the present conflict.

E. Richard Schayer, an American, who has seen seven months active service with the British army in France, tells the strange story of a French soldier who let himself be shot for cowardice and desertion rather than kill his enemies.

In his "Annual Christmas Farce" Edwin L. Sabin offers help to the reluctant giver in saving his money and keeping his friends.

How to get rid of bad habits and win success through acquiring good ones is explained in a new department devoted to this subject.

What will become of the stage is predicted by Walter Prichard Eaton in his article on "Actor-Snatching and the Movies." The "Fifth Wheel," by Olive Higgins Prouty, continues the experiences of a society girl who rebelled against her family and environment. As a prelude to a series of articles on preparedness, Professor Charles Downer Hazen describes the tragical Franco-Prussian farce of 1870. Fiction is contributed by Marjorie Benton Cooke, Ellis Parker Butler (who offers a new "Swat" story), Walter Prichard Eaton and Walter A. Dyer.

The time and trouble required to be thoroughly married are described by "Sid." The usual departments "Interesting People" and "The Family's Money" round out a number that contains many excellent magazine features.

### President Hadley's Meaning.

President Hadley's power of condensation as a writer and speaker is well known. He says much in little and seldom resorts to illustration. In advocating national preparedness, in the political and moral as well as in the military sense, at Norwich, Conn., on Tuesday, Mr. Hadley said:

"the thing that has made Germany dangerous in the present war is the belief that she has a new political gospel to preach to the world—a gospel so important that it allows her to override treaties and even to disregard the dictates of common humanity as being of small importance in comparison with the new gospel which she has to preach."

President Hadley of course alludes to the gospel of Kultur, which must be taken in a military as well as in a political and moral sense. It is an assumption of superiority in the art of war no less than in science, industry and government. Germany regards herself as the most intelligent, thorough and masterful nation in all that relates to human progress. With serene faith in herself she believes it would be better for the world if she conquered her enemies in Europe; that the world would benefit by her example, her teachings and her political regulation.

In short, the German Imperial Government aims to be the, as distinguished from a, world Power. This, we have no doubt, is what President Hadley means. The bearing upon the duty of the United States to set its house in order and to arm to defend its national policies must be obvious to the plainest understanding.—New York Sun.

### The Incurable Optimist.

Well, anyhow, bad as things are, in every case they might be worse," said Happimug, smiling joyously.

"Humph!" growled Frowning-brow. "I suppose you can see something to be glad about even in Bryan."

"Sure I can," said Happimug. "He might have been twins."—New York Times.

J. F. Schall and son, Joe, and daughters, Pauline and Edna, went to Kansas City Saturday morning to spend the day.

### Short Course Pays.

Two brothers who attended the Agricultural Short Course at Columbia, Mo., write:

"This year we tied the ribbons at three horse shows at Worth, Altamont, and Coffey, Mo., and judged the corn show at Maysville, Mo. We sprayed a neighbor's orchard for a share of his apples which we sold for \$75 in spite of the oversupply of apples on the market this year. We believe the short course pays."

### We Certainly Do Love Work.

We are prepared to do better work and more of it than ever. Why half mix your concrete the old way? Let us mix your concrete the up-to-date way. We have the best mixer on the market. Your concrete does not cost you as much as it did the old way. Yet it is a hundred per cent better, because when we mix it, it's mixed. That's all.

### HE SOON LEARNED HOW TO FARM IN CALIFORNIA

Louis L. Norton, who had been in the mercantile business "back East" for many years, came to Santa Clara County, Calif., four years ago, absolutely ignorant of farming. But he soon found that perseverance and pluck meant success. He has a fine fifteen-acre prune and apricot orchard that is bringing in over \$2,500 a year and this year expects his land to net him over \$150 an acre.

Are you doing as well? Are you clearing \$150 an acre? If you want to know how Louis Norton succeeded, and how hundreds of others are succeeding in the beautiful Santa Clara Valley, get out your pen and paper and write us a letter right now. Don't put it off until you have forgotten it. Clip this advertisement and simply send us your name and address with it.
